“ChatGPT - A Digital Tool for Human Being”

ChatGPT

ChatGPT- A digital Tool for Human Being.

Digital Tools

Learning

Artificial Intelligence

A science devoted to making machines think and act like humans.

Machine Learning

Focuses on enabling computers to perform tasks without explicit programming.

Deep Learning

A subset of machine learning based on artificial neural networks.

OpenAI

In 2015, former Y Combinator CEO Sam Altman and business “magnet” Elon Musk spearheaded an initiative for safe and open AI development. And that’s where the history of OpenAI began.

By Altman “the greatest threat to humanity.”

OpenAI is a research company that aims to promote and develop “friendly” AI. Last year’s ChatGPT and DALLE-2 managed to take AI mainstream, and now the company is looking to make a few new friends, with Microsoft reportedly planning to pump \$10 billion into the business.

How to use ?

2015

Focus on video games and other applications

2016

Released its first tools, an open-source toolkit for reinforcement learning (RL) OpenAI

2018

Released a paper “Improving Language Understanding by Generative Pre-Training”—introducing the concept of a Generative Pre-trained Transformer (GPT).

How to use ?

2018

Released DALL-E, an AI using a similar architecture to GPT-2, Instead of generating text, DALL-E—a could create photorealistic images as per text instruction.

2021

Released a paper “Improving Language Understanding by Generative Pre-Training”—introducing the concept of a Generative Pre-trained Transformer (GPT).

2022

- GPT's are neural networks—machine learning models inspired by the structure and function of the human brain— trained on a large dataset of human-generated text. It can perform many functions like generating and answering questions, among other things.
- 2022, OpenAI released ChatGPT, a language model chatbot built on top of GPT-3.
- GPT-3 was fed 45TB of text data that translated into 175B parameters. It was smarter, faster, and more terrifying than anything we had seen before.
- Microsoft designed a supercomputer for OpenAI that included 285,000 CPU cores and 10,000 GPUs.
- 10 Millions users in 5 Days

Types of Machine Learning

Machine Learning

Supervised

Task Driven
(predict Next value)

Unsupervised

Data Driven
(Identify Clusters)

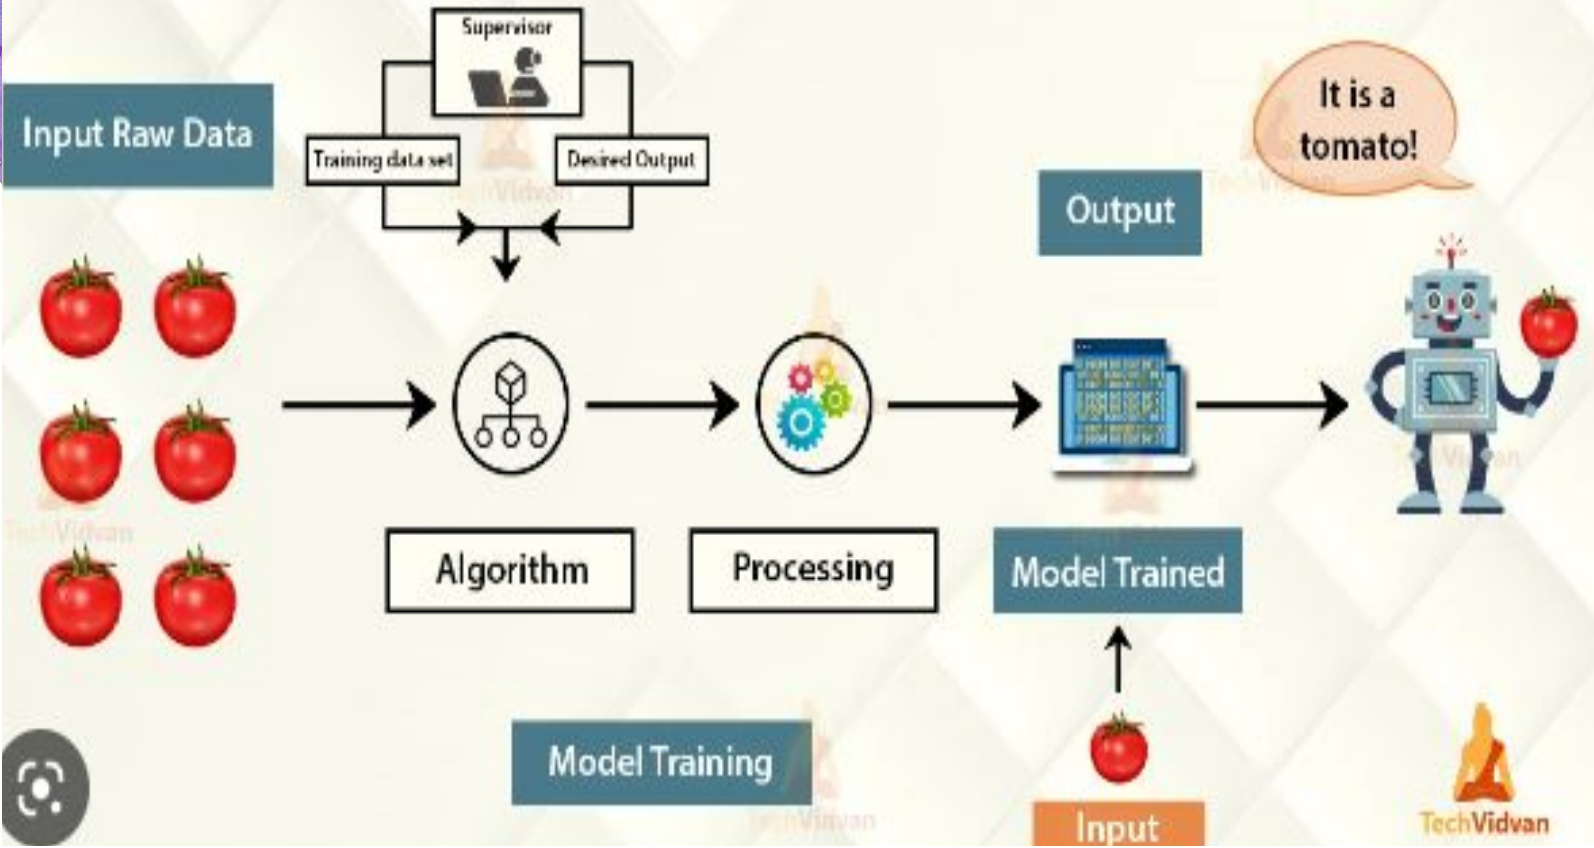

Reinforcement

Learn From
Mistakes

Supervised Learning in ML

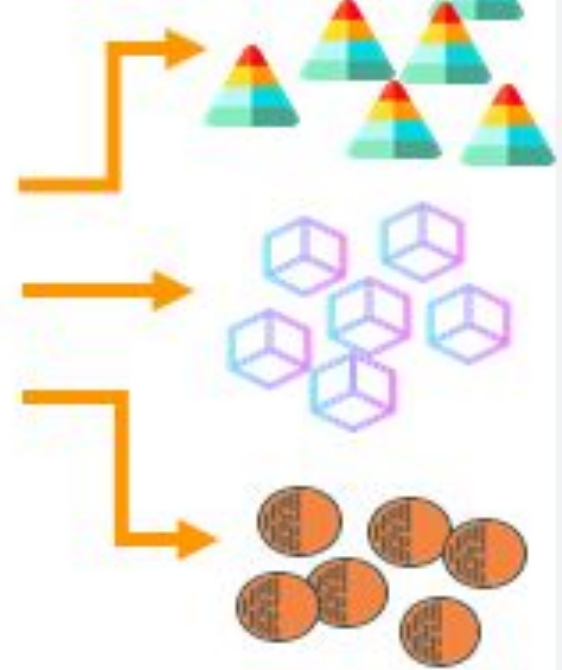

Unsupervised Learning

Raw Data

Classification

Regression

Clustering

Decision Making

- Naive Bayes Classifier
- Decision Trees
- Support Vector Machines
- Random Forest
- K – Nearest Neighbors

- Linear Regression
- Neural Network Regression
- Support Vector Regression
- Decision Tree Regression
- Lasso Regression
- Ridge Regression

- K-Means Clustering
- Mean-shift Clustering
- DBSCAN Clustering
- Agglomerative Hierarchical Clustering
- Gaussian Mixture

- Q-Learning
- R Learning
- TD Learning

How to use ?

From PC

Go to [chat.OpenAi.com](https://chat.openai.com) and register for an account with an email

From Android

Open Browser-> Type [Chat.openAi.com](https://chat.openai.com)-> Option to Add Shortcut

Access from Program

Find API Key & Replace it

PIP install openai

```
import openai
import os
```

```
openai.api_key =
os.environ["sk-1fYqx8Z10orRIbtOgfyPT3BlbkFJ5F3Qy0SJ9UHc1Z9
OF4df"]
prompt = "Hello, ChatGPT! How are you today?"
```

```
response = openai.Completion.create(
    engine="davinci",
    prompt=prompt,
    max_tokens=50,
    n=1,
    stop=None,
    temperature=0.5,
)
print(response.choices[0].text.strip())
```

```
DELL-E
def openai_image(prompt):
    response =
    openai.Image.create(
        prompt=prompt,
        n=1,
        size="512x512"
    )
    image_url =
    response['data'][0]['url']
    return image_url
```

What is it?

- ❖ **CHATGPT uses a neural network architecture called a transformer to process input text and generate output text.**
- ❖ **pre-trained on a large dataset , already learned**
- ❖ **patterns and structure of natural language.**
- ❖ **prompt-> CHATGPT> Output(Pre-trained knowledge to generate a response)**

- **Write Code**
- **Write Music**
- **Translations**
- **Extract Data from Text**
- **Essays**
- **Maths Questions**
- **Unique Ideas and Examples**
- **Critical Thinking (with a Limitation)**
- **Jokes**
- **Can Act as a Linux terminal**
- **Debug Code**

<https://platform.openai.com/examples>

What is it?

DALL·E 2 is an AI system that can create realistic images and art from a description in natural language.

- create original, realistic images and art from a text description
- expand images beyond what's in the original canvas, creating expansive new compositions
- remove elements while taking shadows, reflections, and textures into account.
- create different variations of an image.

Ref:

<https://openai.com/product/dall-e-2>

Limitation

- Limitations in Input Length and Output Length**
- Possible Biases in Training Data**
- A Passable Sense of Humor**
- Lack of data in Music**
- Outdated Data, Lack of data**
- Scientific Research , Except Review Literature.**
- Difficulties Understanding Figurative Phrases**

Thank You
